15.05.2000 Sebastian Klein <sklein@mi.uni-koeln.de>

Literatur

1 Zu symmetrischen Räumen

- *als Nachschlagewerk:*
  Sigurdur Helgason, "Differential Geometry and Symmetric Spaces", Academic Press, New York 1962
- *zur Einführung:*
  Barrett O'Neill, "Semi-Riemannian Geometry", Academic Press, New York 1983
- Shoshishi Kobayashi, Katsumi Nomizu, "Foundations of differential geometry, Vol.II", Interscience Publications, New York 1969
- Joseph Wolf, "Spaces of Constant Curvature", McGraw-Hill, New York 1967

2 Über die komplexe Quadrik

- Helmut Reckziegel, "On the Geometry of the Complex Quadric", Geometry and Topology of Submanifolds VIII (1996), 302–315
- Bang-Yen Chen, Tadashi Nagano, "Totally Geodesic Submanifolds of Symmetric Spaces, I", Duke Mathematical Journal 44 (1977), 745–755
- Kazumi Tsukada, "Totally Geodesic Submanifolds of Riemannian Manifolds and Curvature-Invariant Subspaces", Kodai Mathematical Journal 19 (1996), 395–437

3 Über (M_+, M_-)-Theorie

- Bang-Yen Chen, Tadashi Nagano, "Totally Geodesic Submanifolds of Symmetric Spaces, II", Duke Mathematical Journal 45 (1978), 405–425
